

Autumn meeting of the EEG SIG

Saturday 9 October 2010

at

**Colwall Village Hall, Mill Lane, Colwall, Nr Malvern, Worcs
WR13 6EQ**

Optional trip to British Camp on Sunday 10 October 2010

Patrick MacManaway: "Feedback from the Farm – Dowsing in Agricultural Applications"

Depending on the species and type of earth energy exposure, a wide variety of the plants and animals that we domesticate and farm are affected by earth energies for better and worse. Geopathic stress is significant in its impact on cows and horses, brussels sprouts and carrots. Enhanced and appropriate energetic gardening or farming can improve germination, fertility, health and yield.

Patrick will review the body of research accumulating on agricultural dowsing applications and also share from his own experience and case studies.

Robin Heath: Megalithic Magic - the end of the archaeological model of prehistoric culture?

This presentation follows the work and research undertaken during the past two years at Carnac, Brittany, and in the Preseli Mountains of West Wales by Robin Heath and his brother Richard. It will show that precision astronomical alignments are normal practice from dolmens, that monuments were located according to accurate geometrical patterns, and that the megalith builders were also impressive land surveyors. Because this research is objective it may be checked by anyone using google earth and simple school geometrical techniques.

Chris Street: Earthstars, the London stargate and sacred geometry

Chris Street's Earthstars discovery is the most complex and significant example of Landscape Geometry linking ancient sites. Discovered in the early 80s, it shows that London's ancient sites are laid out to a recognisable temple groundplan on a vast scale. Part of it mirrors the layout of Stonehenge 3,500 years ago. More surprisingly, John Michell's work shows the design conforms to the measures and proportions of the biblical City of Revelation, the New Jerusalem.

In this fully illustrated talk, Chris will explain how the discovery unfolded, how it may be a fulfilment of William Blake's visions, and what it means as we approach 2012.

Paul Remfry: Prehistory of the Malvern Hills

Paul is an historian and archaeologist and the author of *The Herefordshire Beacon and the families of King Harold II and the Earls of Hereford and Worcester*.

His talk on this subject covers the Prehistory of the Malvern Hills and the relationship between the three main prehistoric monuments on the Malvern Hills. The story of the evolution of what appears to be the ritual monument of the British Camp is taken from the Bronze age until the destruction of Earl Harold's castle in 1155.

Earth Energies Special Interest Group Autumn Meeting Booking Form

Saturday 9 October 2010

at

**Colwall Village Hall, Mill Lane, Colwall, Nr Malvern, Worcs
WR13 6EQ**

Saturday: start 09.30 (registration) for a 10.00 start. Finish 17.00

Sunday: Meet at British Camp 10.00. Finish around lunchtime.

Price includes tea / coffee and biscuits

PRICE: BSD member £40

Non members £45

(£5 for the optional trip to British Camp on Sunday 10 October)

Please return the completed form, with full payment, before 24 September 2010 to:

Adrian Incedon-Webber, Lower Farm, 10 Main Road, Cherhill, Wiltshire SN11 8UT

Tel: 01249 818807 or 07778 050419

Email: adrian@dowsingspirits.co.uk
